

## Pan's Garden – Grade 8

### To Be Completed at School AFTER Field Trip

#### **ELABORATE (Post-Visit - at school):**

Have students read the [Photosynthesis - Modern Applications](#) website. Ask them to answer the following questions:

- 1) Why might you need to have a basic understanding of photosynthesis in today's society? How might this understanding help you lessen your negative impact on the environment?
- 2) How might society change without the process of photosynthesis? Why is photosynthesis important to our daily lives? How might we be able to use photosynthesis more effectively?

OPTION: Have students submit their answers to these questions when prompted through the website.

**EVALUATE (Post-Visit - at school):** Have students complete the [Post-Survey](#). Scan and email completed student surveys to Susan Lerner at [slerner@palmbeachpreservation.org](mailto:slerner@palmbeachpreservation.org).
