

## Pan's Garden – Grades 2-3

### To Be Completed at School AFTER Field Trip

#### **ELABORATE (Post-Visit – at school):**

Have students complete the [Insect Observation Sheet](#) in groups of 3 or 4. Take students to a fairly open natural area where you can monitor all groups. Set boundaries for how far they can go.

Ask: In addition to helping with pollination of plants, how else do you think insects can be helpful?  
(Answers will vary but may include things like they eat “bad” bugs, help clean up waste, are food for animals, etc.)

**EVALUATE (Post-Visit - at school):** Have students complete the [Post-Survey](#). Scan and email completed student surveys to Susan Lerner at [slerner@palmbeachpreservation.org](mailto:slerner@palmbeachpreservation.org).
